

## MEDICAL UPDATES FOR PIONEER MONICA AKOACHERE FOCHO

Date: 03/02/2015 2:06 PM (GMT+01:00) (MONDAY)

Greetings,

Please find below today's update on your patient currently under treatment in India:

The Patient was received well from the airport yesterday and admitted at the hospital. Post evaluation she was found to be case of severe Osteoarthritis Both Knees with Joint deformity and bone loss. Secondly she is \*\* years of age. Keeping in consideration the above facts the surgery will be staged in two sittings in the same admission. The Planned procedure for tomorrow is Unilateral total knee replacement.

The Attendant and Patient both are comfortable.

The Patient was received well from the airport on 1st March, 2015 and admitted at the hospital. Post evaluation she was found to be case of severe Osteoarthritis Both knees with Joint deformity and bone loss. Secondly she is \*\* years of age. Keeping in consideration the above facts the surgery had to be staged in two sittings in the same admission. **She successfully underwent Unilateral Total Knee Replacement yesterday and was kept in HDU for overnight observation. Post Morning rounds with Vitals stable and no fresh complaints, she has been shifted back to the room and physiotherapy has been started.**

The Attendant is also comfortable.
